

# Locally Led Emergency and Recovery Action in Pakistan (LEAP)

## Pakistan Floods 2022 - Situation Report#8

31 March 2023

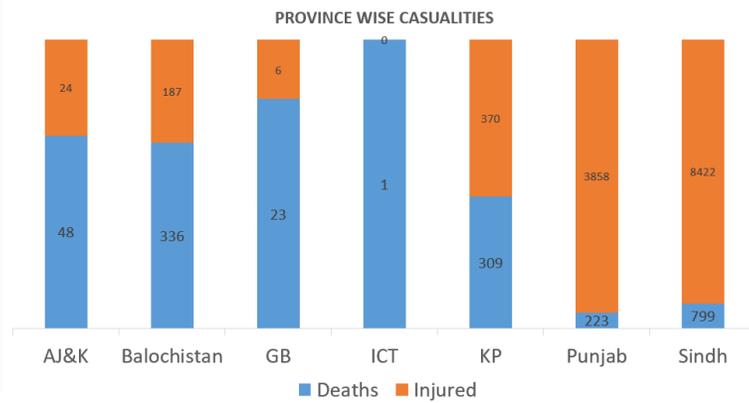

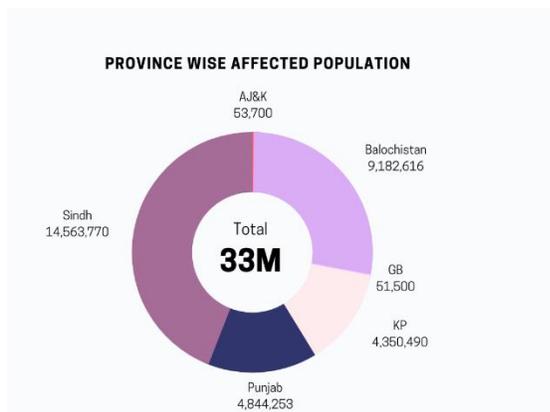

### Highlights

- US\$424 million have been funded out of US\$816 m for the Floods Response Plan.
- More than 10 million people, including children, living in flood-affected areas remain deprived of safe drinking water
- Flood water is also stagnant in some areas of Balochistan where the risk of water borne diseases is increasing.

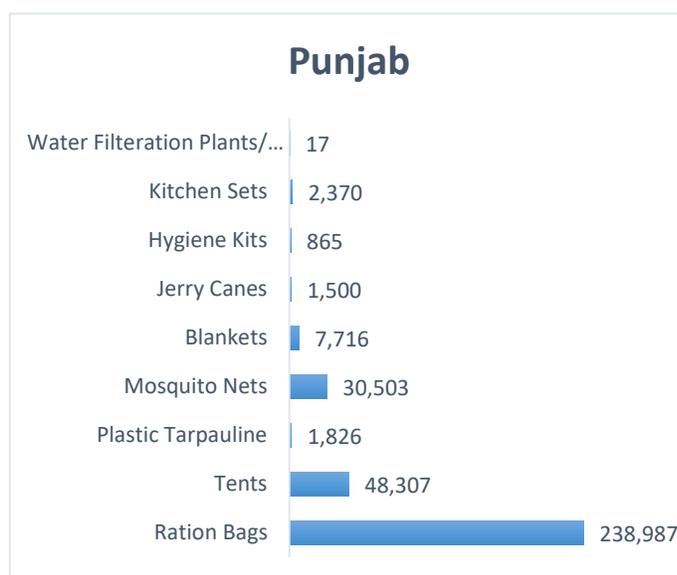

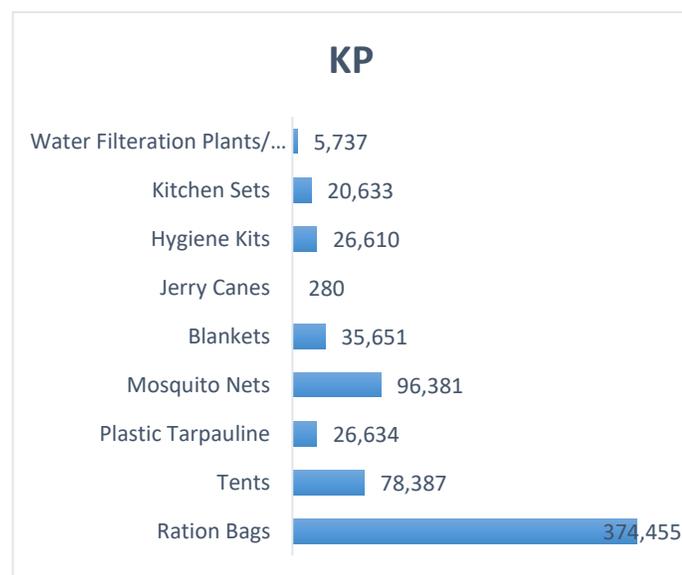

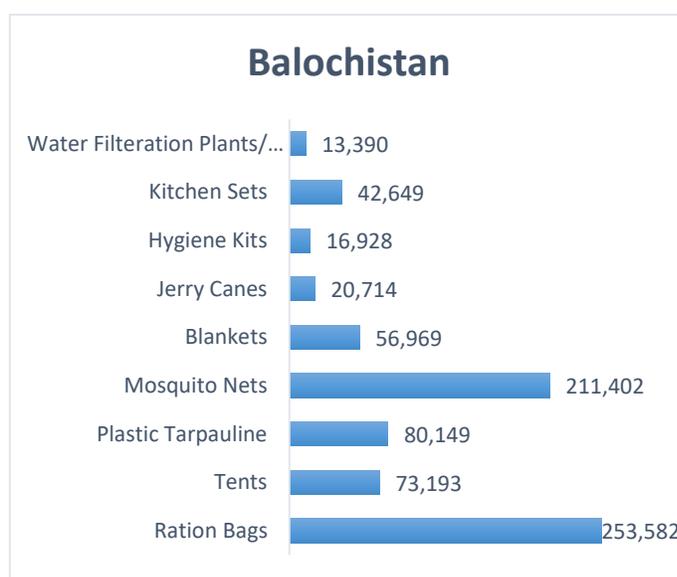

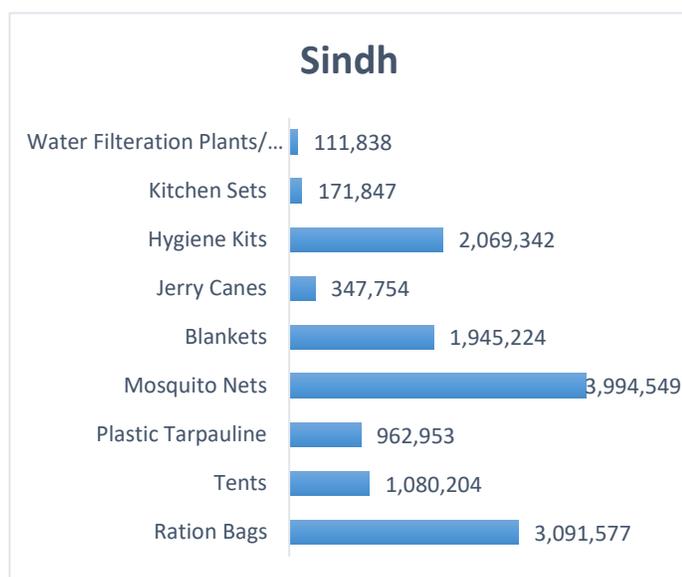

### OVERALL RELIEF

### Summary of Damages

## PROVINCE WISE RELIEF

### Major Issue and challenges

- Lack of funding for Floods response plan.
- Weak disease surveillance.
- Lack of coordination by sector partners in terms of timely data submission.
